

WeldOps GS-300 Safety Goggles

Indirect-ventilated safety goggles

WeldOps GS-300 Clear; DIN Shade 5

High-performance sealed goggles for every application

Designed for welders, WeldOps GS-300 goggles feature indirect venting to guard against chemical splashes while still permitting airflow. An ultra-soft face seal allows a perfect fit on most facial profiles. The wide, adjustable elastic strap ensures a tight fit, and the low-profile anti-fog coated lens delivers clear vision in all conditions. Available in a clear or shade 5 lens for brazing, make these your go-to safety goggles for maximum protection and comfort on the job.

Applications:

General purpose impact protection

General purpose chemical splash protection

Shade 5 for grinding

- Indirect venting protects against chemical splashes
- Ultra-soft face seal conforms to most facial profiles
- Wide, adjustable elastic strap
- Low-profile anti-fog coated lens
- Meets CE, UKCA, ANSI, and CSA requirements
